

The SNOUT at Work!

Arrow points to SNOUT and Oil Boom in structure capturing oil and debris in a catch basin. This is a typical application for a fueling station or convenience store. Cost for up to 18" SNOUT and Oil Boom less than \$375.

Simple Proof– Two Structures, Same Site, Same Time, Different Results...

Inlet shown with no SNOUT that flows into structure with SNOUT. Water clear, no oil, little trash.

Structure with SNOUT stopping oil and debris from upstream. Site is in West Valley City, Utah. Installation was featured in 2004 Stormwater Magazine Article.

The SNOUT Stops Trash!
